## CHAMPIONS FOR HEALTHY CPS

Disney's After School Computer Science Club's partnership with CPS Vision program.

### Disney Magnet Students Build Glasses App!

Students at Walt Disney Magnet School, under the direction of Mr. Bradley Fisher and Mr. Luis Ferrel, partnered with Apple to develop an app that to combines technology and health services..

The app the Disney students created allows people to design their own eyeglass frames. With the CPS Vision Exam Program in mind, the students believe the app can help provide personalized frames that can be printed in the school's Makers Lab with 3D printing using materials like metal and carbon fiber.

The students are now working on the business aspect of the app. OSHW supports the partnership and is looking forward to using the app to provide students in CPS with a 2nd pair of eyeglasses!

OSHW can't wait to see their progress this school year!
